Construction Sites

Construction sites can be some of the most risky and challenging places to work, with the prospect of injury for anyone who steps onto a site to carry out work.

Here are a list of the most common health and safety risks that exist on building sites:

Confined Spaces

Danger
Confined
space

Do not enter
without a
permit to work

Trenching & Excavation

Slip, Trips & Falls

Working at Heights

Handling Load & Moving Objects

Electricity
